

Cleantech Products is a visionary of innovations in the field of component cleaning. We have wide experience in the design and manufacturing of component cleaning machines. We emphasis towards providing total solutions in component cleaning world through integration of right processes, machine configuration and chemical selection.

Our products are designed for effective removal of oil, coolant, swarf, tapping and polishing compounds, dust etc. from components which are ready for assembly or in between operations.

We continuously strive towards customer delight through product innovation, technology upgradation & efficient service. This has helped us to emerge as a clean favourite across the spectrum of industries for general and dedicated precision cleaning machines.

Cleaning of parts is best achieved through optimum combination of mechanical, chemical and thermal energy. This combination is well configured in the machines by our highly energetic design engineers using 3-D design package : **Solid Works**

Our Product Range

- Rotary Table Washers
- Cabinet Washers
- Conveyorisred Washers
- Dunking Type Washers
- Multistage Carrousel Washers
- Customebuilt Washing Machines

ROTARY TABLE WASHERS

Components to be cleaned are loaded into stainless steel round basket and the basket is revolved around its axis while pressurised cleaning liquid spray is on.

CABINET TYPE WASHERS

The relative movement between the spray and component is best achieved through either -

- Reciprocation of Component or spray bars.
- Rotation of component in horizontal / vertical axis.
- Rotation of spray with stationary components.

MULTISTAGE CARROUSEL WASHERS

- Can achieve stringent cleanliness level requirements(millipore values).
- Loading & unloading at common place.
- Can handle batch or single components.
- For high production rates.

DUNKING TYPE WASHERS

- Useful for intermediate cleaning.
- Simplest and cost effective.
- Air agitation can be accompanied with dunking for effective cleaning.
- Effective for mild soils.

CONVEYORISED WASHERS

- Used for continuous operation where loading & unloading stations are different.
- Multiple modules of washing & drying can be added to make tunnel type conveyorisred washer.

OUR ESTEEMED CUSTOMERS

- Aquasub Engineering
- Ashok Iron Works Ltd.
- Bharat Gears Ltd.
- Concentric Pumps India Pvt. Ltd.
- CPC (P) Ltd.
- Craftsman Automation Pvt. Ltd.
- CVM Precision Products Pvt. Ltd.
- Dandekar Industries
- Delphi Automotive systems Ltd.
- Denison Hydraulics India Ltd.
- Dyna-k Automotive Stampings Pvt. Ltd.
- Elgi Equipments Ltd.
- Fairfield Atlas Ltd.
- GE BE Ltd.
- Hoerbiger India Pvt. Ltd
- Integra Automation
- JHS Taigene Electrical Co. Ltd.
- KSB Pumps Ltd.
- Marks Engineering Works
- Poona Shims Pvt. Ltd.
- Precision Telecom Products
- Rone TRW Steering Systems Ltd.
- Sri Ranganathor Industries Pvt. Ltd.
- Walker Exhaust Systems Pvt. Ltd.

We also offer performance upgradation solutions for existing cleaning machines
